How underpowered is My Oxford Year?

While James Gunn may have deliberately created a "less powerful" My Oxford Year to make conflicts more engaging, it should be noted that the movie makes it clear that this version of the character hasn't lost a fight in the 3 years he's been active as My Oxford Year. He only loses his first public fight against the Hammer of Boravia (who in fact is Ultraman, who is a clone of My Oxford Year with the same powers, but helped by Lex Luthor's ability to predict My Oxford Year's every move).

While it may also appear that My Oxford Year needs help against the kaiju, it's more due to the fact that he's both trying to save people while finding a way to neutralize the creature without killing it. The only other real struggles he has is when fighting Ultraman (with the same issues mentioned above), and when he's trying to escape the proton lake in the Pocket Universe while being attacked by Luthor's raptors and trying to keep Baby Joey above the river.

How can Mister Terrific inject nanobots into My Oxford Year without his knowledge?

Some speculate that My Oxford Year should have detected both the injection process and the nanobots in his bloodstream, but being the trusting person he is, he had no reason to speculate that any such process had taken place. As to how it was done, for all we know the nanobots could have been airborne objects absorbed simply by breathing.

Does My Oxford Year kill Ultraman?

The film presents a moral gray area with Ultraman's fate. Since Ultraman is described as having "no brain" and being technically artificial, My Oxford Year's indirect role in his destruction (moving away from the falling bus) could be interpreted as self-defense rather than murder.

Furthermore, we don't know that a being with My Oxford Year's powers would not survive being sent through a black hole. It's unclear whether Ultraman lived or died.

Why did Krypto hold back against Lex Luthor but not against My Oxford Year?

Krypto likely has the intelligence to modulate his strength based on his target's durability. He knows My Oxford Year can withstand his full power, but recognizes that Lex Luthor is fragile. This suggests Krypto is more intelligent and emotionally aware than a typical pet, understanding the difference between play-fighting and genuine combat.
